

BicyLift Container

To stiffen BicyLift container, install the two straps in X as represented below. Keep it tightened for rigidity.

If you have ordered shelves, sliding shelves or drawers here is how to install them.

1. Install the 4 clamping nuts on the desired level
2. Screw in a little the M6x12 screw with a 4mm Allen key
3. Position the shelf or drawer
4. Tighten the 4 screws. If it is a sliding shelf or drawer, you need to open it to access the screws.

Thank you for your confidence in BicyLift's products. If you need help or advice don't hesitate to contact us:
